

EUROPEAN ACTION

Europe needs to grow strong and healthy again. Today it is sick and weak due to the absolute *Götterdämmerung* it suffered during the 20th Century. After the white peoples had torn themselves apart in two World Wars, unbridled Rothschild-Capitalism triumphed in the West and Marxist terror in the East. Between the US and the USSR, that are merely two millstones of the same organization, independent Europe was crushed.

Meanwhile the Soviet empire has collapsed. But, strangely enough, even the former victorious West European Allies find themselves on the losing side: The British and French empires are gone, and their indigenous peoples suffer equally under foreign domination and third-world immigration as do the defeated Germans. After the Bolshevik experiment ended Russia was downsized and gradually westernised. In eastern and southern Russia the Chinese are immigrating into the country and creating a similar *fait accompli* as do the Turks in Germany, the North and the black Africans in France or the Asians in England and Holland. None of these civil occupiers is here by chance: the mixing of races and peoples is part of the program of the New World Order, and its protecting power is the United States with its military machine. For this purpose US troops are stationed in many countries around the world.

But it's an open secret: America controls the world - but the Israel lobby controls America. *This lobby and the US elite associated with it are the true and only winners of the last world war.* Via the media, politics and education and with the help of their consenting regional accomplices they manipulate public opinion throughout the Western world - *and particularly in Europe.* It is in this constant brainwashing that the form of thought control known as "political correctness" finally found its origins. In many European countries this has even evolved into *speech prohibitions* based on the criminal code. Because of such gag laws political prisoners in Europe often sit in prison for years.

The result of the last hundred years is that the once proud European culture is being gradually destroyed.

The proportion of the world's white population has declined from 30% to 10%. A multifarious and ever-present enemy controls our part of the world politically, militarily, demographically, culturally and economically. Worldwide the trinity of Wall Street, the Pentagon and Hollywood appear to have everything in their hands. Nevertheless, there are signs that this colossus is faltering - and apparently has passed the peak of its power. The time has come: A joint effort by all Europeans can lead to freedom. The struggle for the independence of our continent is the task that **EUROPEAN ACTION** has taken upon itself. Do not rely on political parties or governments! Most have sold out or are being blackmailed. Freedom must come from clear heads and brave hearts as are being mobilized in EUROPEAN ACTION.

One role model is the liberation of Spain from Moorish domination one thousand years ago. For all of Europe the motto of yesteryear is as valid today as then: RECONQUISTA - Reconquest! Together we are strong! But it is high time to stir ourselves from our slumbers, sentimentality and cowardice before the New World Order sends all freedom-loving people to Guantanamo. The **7 OBJECTIVES** (see the reverse side) are the guidelines for our deeds. If you apply them in word and deed you belong to the freedom movement of the future, to European Action.

We have a choice: RECONQUISTA - or REQUIEM!

The 7 Objectives of EUROPEAN ACTION

EUROPEAN ACTION is non-partisan and extra-parliamentary. It includes all those Europeans who hold to the 7 objectives as given below. It aims to achieve these objectives firstly by educating as wide a circle of people as possible in all the countries of Europe, secondly by their participation and thirdly by nurturing a group of people capable of accepting responsibility in the future.

1: RESTORATION OF FREEDOM OF SPEECH

We seek freedom of expression, of news coverage and of historiography. We are against gag laws, such as "Incitement of the People" (Volksverhetzung) in the Federal Republic of Germany, "Re-engagement in NS activities" (Wiederbetätigung) in Austria or the "Racial Equality Law" (Antirassismugesetz) in Switzerland and corresponding injustice in other countries.

2: WITHDRAWAL OF ALL FOREIGN TROOPS

We seek the withdrawal of the USA from Europe and other Western Allies from Germany corresponding to the Soviet withdrawal from East Germany (GDR) and Eastern Europe after 1990.

3: REPATRIATION OF NON-EUROPEAN IMMIGRANTS

We seek an end to immigration from other continents and for the repatriation of foreigners from other continents. More sensible is political and economic support from Europe as humanitarian aid to their countries instead of the transport of refugees to Europe.

4: SELF-DETERMINATION FOR THE GERMAN PEOPLES OF THE FED. REPUBLICS OF GERMANY & AUSTRIA REGARDING MATTERS OF STATE

We seek an end to foreign rule in Germany and that part that is now Austria. The Federal Republics of Germany and Austria, and the German Democratic Republic were established on the territory of the German Reich at the end of the war by the Allies in breach of international practice. Required is the creation of a lasting peace in Europe by concluding the peace treaty with the German Reich outstanding since 1945.

5: CREATION OF A EUROPEAN CONFEDERATION

The European peace treaty would permit the dissolution of the EU and NATO with a European league having a common foreign and defence policy with the utmost freedom of domestic, cultural, educational, financial and economic policies of the member countries. In addition, we seek an agreement of strategic cooperation with Russia.

6: TRANSITION OF THE MONETARY SYSTEM AND THE MEDIA INTO PUBLIC PROPERTY

- 1.) In future the central banks should be run by state corporations not only in theory but also *in practice*.
- 2.) The state is to revoke the provision of legal protection for private interest charging.
- 3.) Only recognised state, financial and cultural corporations should have the right to operate commercial banks.
- 4.) The media may be published solely by clearly identified and *responsible* corporations. Only in this way is freedom and diversity of reporting possible.

7: RESTORATION OF TRADITION - FIGHT AGAINST DECADENCE AND THE DESTRUCTION OF THE ENVIRONMENT

Stop cultural disintegration. The remnants of European tradition must be readopted and further developed. We attach particular importance to the health of young people and the family, conservation of the environment, organic agriculture (including decentralised seed production) and organic, nature-friendly developments in medicine, transport and the production of energy.
